## TECHNICAL DATA SHEET

MATERIAL CODE

**105010**

Hypalon / Neoprene coated polyester fabric 1050 gr. white

|                             | direction | value        | unit             | condition        | tolerance |
|-----------------------------|-----------|--------------|------------------|------------------|-----------|
| Scrim composition Polyester |           | 1100,0       | dtex             |                  |           |
| Weight scrim composition    |           | 230,0        | g/m <sup>2</sup> | BSF 100 meth. 18 |           |
| Weight coating              |           | 785,0        | g/m <sup>2</sup> | BSF 100 meth. 18 |           |
| Weight total                |           | 1015,0       | g/m <sup>2</sup> | BSF 100 meth. 18 |           |
| Thickness                   |           | 1,0          | mm               |                  |           |
| Breaking load               |           | 3500,0       | N/5cm            |                  |           |
| Strain                      |           | 300,0        | N/5cm            |                  |           |
| Adhesion                    |           | excellent    |                  |                  |           |
| Temperature continuous      |           | 120,0        | °C               | BSF 100          |           |
| Treatment                   |           | UV-resistant |                  |                  |           |
